

13.04.2015

To whom it may concern,

Aged Care Services Australia Group engaged the services of Paul Camilleri of Australian Risk Service (ARS) to conduct AS / NZS 4801 Audits at several of our 39 Residential Aged Care Facilities.

Paul Camilleri and his team conducted thorough audits of our sites provided a comprehensive report.

Subsequent to the audits, ACSAG further engaged ARS again to review all 39 Facilities and provide Technical Risk Assessments according to Codes of Practice and Australian Standards for:

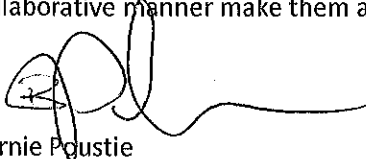

- Plant and equipment
- Manual Handling
- Heights
- Confined Spaces
- Ergonomics
- Dangerous Goods
- Noise

The Technical Risk Assessments and Safe Operating Procedures covered all areas of our operations from Nursing to Maintenance.

Paul and Marius were always accommodating and available to discuss progress, they also engaged and consulted with our employees in an extremely professional manner.

Australian Risk Services have also been engaged by ACSAG to train approx. 400 of our staff in Hazard Identification, I am sure this training will benefit our employees and raise awareness of Workplace Safety.

As the National Health and Safety Manager, I have worked closely with Paul and Marius from Australian Risk Services and would not hesitate to recommend them; their knowledge and willingness to work in a collaborative manner make them an excellent choice.

Bernie Poustie
National Occupational Health and Safety Manager
Aged Care Services Australia Group
