

Chemisal

Resource Recovery

7th October 2010

Letter of Referral

Chemisal – A Division of Dolomatrix Australia have previously engaged the services of Australian Risk Services to carry out an Environmental and Safety Compliance Audit for our Laverton North facility.

The Environmental and Safety Compliance Audit comprised of the examination of:

- Prescribed Industrial Waste (PIW) Streams collected.
- Environmental management of waste
- Storage requirements for PIW of a Dangerous Goods and Hazardous Substance nature
- Transport and legislative requirements for the transportation of PIW
- Legislative compliance
- Internal work instructions on the safe handling and processing of PIW
- Conducting structured interviews with a cross section of staff
- Verification of processes and work practices carried out on the site.

Upon conclusion of the audit Australian Risk Services provided a very comprehensive report detailing the findings and providing a Risk Ranking and a set of Recommendations.

We found that Australian Risk Services were well versed in the compliance of PIW and in particular PIW of a Dangerous Goods nature.

Based on our dealings with Australian Risk Services, I have no hesitation in recommended their services.

Yours faithfully

Lisa Gatt
National OHSE Manager
